

# git add

<https://git-scm.com/docs/git-add>

- This command updates the index using the current content found in the working tree, to prepare the content staged for the next commit.
- `git add .` - add all untracked changes to stage
- `git add <path>` - add all files in given path to stage

```
package com.artusacademy  
.  
git/  
Main.java  
public class Main {  
    public static void main(String[] args) {  
        System.out.println("Hello World");  
    }  
}
```

```
