Reviewing and assessing

staging area

- Called the **staging area** or **index**
- An intermediate area where commits can be formatted and reviewed before completing the commit

Untracked changes

Staging area

Repository

repository

- A collection of all files and all the history of the project
- Can be stored in local machine or a **remote** (GitHub, GitLab etc.)
- Often shortened to **repo**
- The act of copying from remote to machine is called **cloning**
