Git Workshop

This repository is for the participants of the Git workshop to fork, clone and make a pull request.

Future Plan

We plan to make a website consolidating all the attendees of the workshop in an automated way using some static site generator. If any one has some free time, feel free to help us out!

A screenshot of a GitHub repository page for a repository named 'workshops'. The page shows a dark theme. At the top, it says 'workshops' (Public) and 'forked from artus-academy/workshops'. Below that, it shows a 'master' branch with 1 branch and 0 tags. A message says 'This branch is up to date with artus-academy/workshops:master'. The repository has 1 commit from user 'nikhilnathr' with the message 'Initial commit'. There are files 'attendees' and 'README.md'. A large section titled 'Git Workshop' contains the text: '1. Copy the repository link' with a sub-section 'Participate'. Below this, it says: 'We plan to make a website consolidating all the attendees of the workshop in an automated way using some static site generator. If any one has some free time, feel free to help us out!'. A modal window is open in the center, titled 'Clone', with tabs for 'Local' and 'Codespaces'. The 'Clone' tab is selected, showing options for 'HTTPS', 'SSH', and 'GitHub CLI'. The 'SSH' link, which contains the text 'git@github.com:nikhilnathr/workshops.git', is highlighted with a red box and has a white arrow pointing to it from the bottom-left. Below this, there are links for 'Open with GitHub Desktop' and 'Download ZIP'.

```
$ git clone git@github.com:nikhilnathr/workshops.git
Cloning into 'workshops' ...
