2. Click “Fork” button

Git Workshop

This repository is for the participants of the Git workshop to fork, clone and make a pull request.

Future Plan

We plan to make a website consolidating all the attendees of the workshop in an automated way using some static site generator. If any one has some free time, feel free to help us out!

Create a new fork

A *fork* is a copy of a repository. Forking a repository allows you to freely experiment with changes without affecting the original project.

Required fields are marked with an asterisk (*).

Owner *

nikhilnathr

Repository name *

/ workshops

✓ workshops is available.

By default, forks are named the same as their upstream repository. You can customize the name to distinguish it further.

Description

A project for workshop attendees to contribute

46 / 350 characters

Copy the master branch only

Contribute back to artus-academy/workshops by adding your own branch. [Learn more.](#)

ⓘ You are creating a fork in your personal account.
