

Create a new fork

A *fork* is a copy of a repository. Forking a repository allows you to freely experiment with changes without affecting the original project.

Required fields are marked with an asterisk ().*

Owner *

Repository name *

workshops

✔ workshops is available.

By default, forks are named the same as their upstream repository. You can customize the name to distinguish it further.

Description

A project for workshop attendees to contribute

46 / 350 characters

☒ Copy the `master` branch only

Contribute back to artus-academy/workshops by adding your own branch. [Learn more.](#)

You are creating a fork in your personal account.

Create fork

Click “create fork” button

Commands

- `git clone`
