

repository

origin

```
$ git remote add origin git@github.com:nikhilnathr/  
git-workshop.git  
$
```

git push

<https://git-scm.com/docs/git-push>

- Updates remote using local, by sending objects necessary to complete the given refs.
- `git push -u origin <branch_name>` - when pushing a branch for first time
- `git push` - for subsequent updates
